PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience building scalable SaaS and enterprise applications using Node.js, NestJS, React, Next.js, TypeScript, PostgreSQL and MySQL. Skilled in microservices, REST APIs, WebSockets, authentication, database optimization, Redis, BullMQ, Docker, CI/CD, AWS, and GCP. Proven technical leader with experience in architecture, code reviews, mentoring, and delivering secure, maintainable products from design to production.

TECHNICAL SKILLS

Architecture & Messaging: Microservices, Event-Driven Architecture, RabbitMQ, BullMQ, Redis Pub/Sub
Programming/Web: OOP, Node.js, Express, TypeScript, NestJS, React, Next.js, REST, JWT, HTML, CSS, Tailwind
Database/DBMS: MySQL, PostgreSQL, Redis, TypeORM, Prisma
SDLC Methodology: Agile-Scrum (Jira, Confluence)
Version Control: Git, BitBucket
Cloud Platform/VM: AWS, GCP, VPC, EC2, EB, RDS, S3, Docker
AI/LLM: Codex, Claude, ChatGPT

EXPERIENCE

Tixio IO

February 2025 - Present

Senior Fullstack Engineer • Dhaka, Bangladesh

- Lead backend development for Vadio (real-time video consultation) and the HR & CRM platform – designing RESTful APIs, WebSocket integrations, and session management with NestJS, MongoDB, and Prisma ORM.
- Design event-driven microservice communication using NATS messaging and BullMQ job queues for async processing (notifications, reporting, data sync) across independently deployable services.
- Build React-based admin portals for Vadio dashboard and HR/CRM management interfaces with role-based access control.
- Mentor junior developers through code reviews, architectural guidance, and sprint planning.

Tech: Node.js, NestJS, TypeScript, React, PostgreSQL, MongoDB, Prisma, NATS, BullMQ, Stripe, AWS, GCP

Liberate Labs

April 2024 - January 2025

Lead Fullstack Developer • Dhaka, Bangladesh

- Led three cross-functional teams delivering SaaS products across e-commerce, legal tech (NDA platform), and education (LMS) – owning technical architecture and client communication.
- Architected rest APIs using NestJS and TypeScript with PostgreSQL and MongoDB, implementing JWT authentication, RBAC, and multi-tenant data isolation.
- Managed AWS infrastructure (EC2, RDS, S3) with CI/CD pipelines, and mentored developers through code reviews and pair programming.

Tech: Node.js, NestJS, Express.js, TypeScript, React, PostgreSQL, MongoDB, AWS, JWT, CI/CD

Tikweb BD

March 2023 - April 2024

Senior Software Engineer • Dhaka, Bangladesh

- Owned backend development for consumer-facing Photo and Planner applications – building REST APIs with NestJS, TypeORM, and MySQL for image processing, subscriptions, and user management.
- Designed multi-queue architectures (Firebase Cloud Messaging, Redis-Queue) for background job processing including push notifications and data synchronization.
- Built React admin dashboard and managed Jira-based sprint workflows; deployed on GCP with containerized environments.

Tech: Node.js, NestJS, TypeScript, TypeORM, React, MySQL, Redis-Queue, Firebase, GCP

Venturas Ltd

February 2021 - March 2023

Senior Fullstack Engineer • Dhaka, Bangladesh

- Architected RESTful microservice APIs using NestJS and TypeScript for a Property Management Application — handling property listings, tenant management, lease tracking, and payment workflows.
- Developed React admin portal for property managers and managed AWS infrastructure (EC2, RDS, S3) with CI/CD pipelines.
- Led code reviews, Jira-based project management, and mentored junior developers through technical interviews and onboarding.

Tech: Node.js, NestJS, TypeScript, React, MySQL, AWS (EC2, RDS, S3), Microservices

Wipro Limited

September 2019 - January 2021

Senior Software Engineer • Dhaka, Bangladesh

- Built and maintained ERP modules (IExpense, Shared Service, TMS) with CakePHP and MySQL — developing RESTful APIs with JWT authentication and role-based access control for web and mobile clients.
- Optimized SQL queries for high-volume transactional data and deployed applications on AWS infrastructure across multi-geography Agile teams.

Tech: PHP, CakePHP, MySQL, REST API, JWT, jQuery, AWS

Teamnet

April 2016 - August 2019

Software Engineer • Dhaka, Bangladesh

- Built Volatour travel booking platform using Laravel and MySQL — integrating SOAP and REST APIs from third-party providers for flights, hotels, and payment processing pipelines.
- Developed RESTful APIs and React admin portal for booking management; deployed on DigitalOcean with server configuration and database administration.

Tech: Laravel, PHP, MySQL, SOAP API, REST API, React JS, jQuery, DigitalOcean

EDUCATION

BSc in Computer Science and Engineering

2015

GSTU, Gopalganj

November 2011 - December 2015
